

2 Day Eco Friendly Jewellery Workshop.

Learning Disability Groups. Woodlawn School, West Monkseaton, Tyne & Wear

Aim: To work with a group of young people with varying physical and learning disabilities to create a range of eco jewellery using found objects from the local coast line.

I worked as a Jewellery tutor for a group of young people with varying physical and learning disabilities to create a range of eco jewellery using found objects from the local coast line.

I accompanied the group to their local beach to collect found objects including sand and shells and beach glass.

The young people adhered their found objects to wooden bangle and

pendant forms using a sand based grout.

All participants achieved the aim successfully and the group expressed their enjoyment from the project and proudly showed their creations to other members of the school.
